

NOTHING OUT-GRABS A GRIPPER® SLING

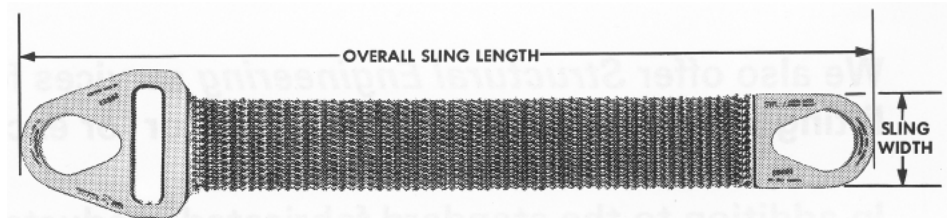

Cambridge metal mesh GRIPPER® Slings out-tough the toughest loads, outwear any other sling.

Cambridge GRIPPER Slings are strong enough to handle anything you can wrap them around and their flexible, woven wire fabric gives you absolute grip. They are simple to rig in either choke or basket hitch. Rigging and unhitching time are reduced...there's no need for a two legged sling.

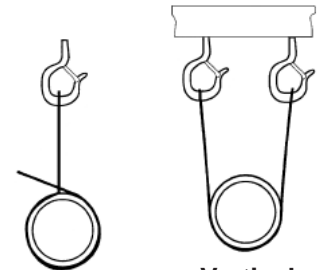

Lengths and widths are available for handling a variety of loads with a design factor of 5. GRIPPER Slings out-tough heavy loads, sharp edges, rugged use. Sunlight won't kill them. Most chemicals won't touch them.

Flat, flexible metal mesh weave resists kinking, tangling and twisting, and the broad bearing surface is ideal for single sling balance loads.

GRIPPER Slings conform to contours of loads. Machined or polished surfaces can be further protected with urethane coatings.
